

Budget for the project:

Democracy by stealth? Does the rise of populism challenge the participatory paradigm of European democracy?

Quantitative survey research (EU28)..... €116,438,69¹

We will conduct a large-n cross-sectional survey examining public opinion towards stealth democracy, decision-making process preferences and support for populism (app. 15 minutes of length). The survey is conducted in all EU's current Member States (including the UK, but excluding countries <1 mil citizen i.e. Malta, Cyprus and Luxembourg). The costs are based on a bid on the project from Epinion www.epinionglobal.com (n=1,500 in all EU countries). Funds cover Epinion's professional help with planning and set-up of the web surveys, professional translation, weighing of data and preparing a data set ready for analysis.

Laboratory experiments121,037€

We conduct laboratory experiments (n=1,000 in total), using skin conductance equipment at four sites: Aarhus University, University of Siena, Freie University in Germany and University of Exeter (n=250 per site). Funds cover payment of subjects (show up fee and awards), payment of research assistance prior, under and after the experiments, equipment, and some places lab rental.

Workshop meetings and dissemination conference35,300€

We hold team meetings in Warsaw, Copenhagen, Berlin, Rome and Exeter. We meet at different locations to ensure that we interact with all relevant national stakeholders' prior data collection, while analysing data and while planning the manuscripts and public dissemination. Funds here cover transportation, lodging and subsistence for team members, plus facility rental and administrative support. Furthermore, expenses include a last dissemination conference (see Danish budget for details)

Conference travel total20,000€

We plan to participate in two academic conferences during the 3 years of the project to promote our results. The experimental results will be presented at the first conference and the survey results at the second. Funds cover fees, transportation, and lodging and subsistence.

Personnel support total706,306.52€

We apply for personnel funding in four categories; (1) buy-outs from teaching duty; (2) Full time post docs; (3) Part time post docs; (3) PhD students; (4) Research assistance. Payment for laboratory research assistance are found under the expenses for the laboratory experiments. No funds will cover overheads or indirect costs. For each of the country specific budgets we state in details all team members, including if and how they are funded.

Total budget: 999,082.21 €

We attach an individual list for each country's team and budget.

¹ Bid provided in Danish Crowns. Exchange rates from 7 December 2018.

Denmark: Principal investigator: Dr Julie Hassing Nielsen (CBS)

	What?	Time period	Total costs (Euro)
<i>Staff costs:</i>			
Dr Julie Hassing Nielsen (CBS)	Full time post doc (6,387.68*36)	3 years	229,956.48
Research assistant	10 hours weekly (10*52=520 hours/year) (520*3 years*19,83 E/hours)	3 years	30,934.8
Associate Prof Dan Mønster (Århus)	No remuneration		
<i>Total</i>			260,891.28
<i>Non-personnel costs</i>			
Travel (4 workshops)	Attendance of 4 group workshops	3 years	3,500
Workshop held in Denmark	1 of the 5 workshops are held in Denmark		3,000
Attendance to conferences	The PI group presents the work on 2 conferences (2000 E*2)	3 years	4,000
Concluding conference	Travel (5*PI) + accommodation (500*5); room booking, catering etc (300 E)		2,800
<i>Total</i>			13,300
<i>Non-recurrent expenses</i>			
Acquisition of survey data	EU25 countries survey data cross-sectional (Epinion bid)		116,438.69
Laboratory experiments (Aarhus University)	Equipment: 1,600 Research assistant: 15,400 Awards decision-making game + show up fee: 9,980		26,980
Literature and other sundry materials			
Science communication measures
